Submitted on 19 Jul 2020

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Key Points:

- Peer review is a crucial component of the high-quality planetary science published in JGR: Planets
- In 2019, 584 individuals provided 901 reviews of papers submitted
- Peer reviewers: thank you for your service to the planetary community

Blaustein Department of Earth & Planetary Sciences, Johns Hopkins University, Baltimore, MD, USA

Abstract Science is at its best when shared widely both within the scientific community and to the broader public. To maintain trust in science while simultaneously maximizing openness, it is important that every paper is carefully vetted. For this we rely on many volunteers, especially our peer reviewers. Their work is key for maintaining the integrity of scientific journals and to ensure the highest standards of scientific rigor. Reviewers verify that the assumptions, the methods, and the inferences made in our papers are sound. Many spend hours going over derivations, analyses, and evaluating the novelty and significance of the submitted manuscript. In 2019, *JGR Planets* benefited from 901 reviews provided by 584 unique reviewers. On behalf of the entire editorial board of *JGR Planets* and the entire planetary science community, we want to express here our most heartfelt gratitude to all of you. Thank you!

Plain Language Summary Peer review is key to vetting every paper submitted to *JGR Planets* in order to ensure the highest standards of scientific rigor in the journal. Reviewers verify that the assumptions, the methods, and the inferences made in our papers are sound. We depend on, and are grateful to, all the volunteers who spent going over and evaluating the submitted manuscript. In 2019, *JGR Planets* benefited from 901 reviews provided by 584 unique reviewers. On behalf of the entire editorial board of *JGR Planets* and the entire planetary science community, we want to express here our most heartfelt gratitude to all of you. Thank you!

Referees for 2019

Individuals in italics provided three or more reviews for *JGR: Planets* during the year.
