HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

JGR Planets

EDITORIAL

10.1029/2021JE006865

Key Points:

- Peer review is a crucial component of the high-quality planetary science published in *JGR: Planets*
- In 2020, 705 individuals provided 1,168 reviews of papers submitted
- Peer reviewers: thank you for your service to the planetary community

Abstract Peer reviewing is the selfless act of evaluating and providing feedback on scientific papers submitted in journals like *JGR: Planets*. Every review is written with the objective of clarifying the article and often contains suggestions for additional analyses or topics of discussion. Reviewers often spend hours examining the rigor of the methods, the validity of the results, and the significance of the conclusions in the submitted manuscripts. The extra effort of our pool of reviewers in a year when we all needed to adjust our daily routines in response to a pandemic has not gone unnoticed. In 2020, *JGR: Planets* benefited from 1,168 reviews provided by 705 unique reviewers. We are particularly grateful to the scientists who remained involved in the review process. We also understand that many of us had to reduce our reviewing commitment this year. Hopefully, the coming year will see a return to normalcy in your lives. To our reviewers, past, present, and future, the entire editorial board of *JGR: Planets* wishes to express here our most heartfelt gratitude. Thank you!

Plain Language Summary Peer review relies on the dedication of volunteer scientists who spend hours evaluating the submitted manuscripts and suggesting ways to improve them. In 2020, *JGR: Planets* benefited from 1,168 reviews provided by 705 unique reviewers. We are particularly grateful to the scientists who remained involved in the review process in an especially challenging year. We also keep in our thoughts those who had to reduce their reviewing commitment this year as the pandemic and other events upset their daily lives. To our reviewers, past, present, and future, the entire editorial board of *JGR: Planets* wishes to express here our most heartfelt gratitude. Thank you!

Individuals in italics provided three or more reviews for *JGR: Planets* during the year.
