HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Science is more than anything else a collective endeavor. Any work that we do builds upon prior works and ideas from our peers, commonly over decades. Any work that we do needs to be questioned and challenged by our peers before it can be demonstrated to be valuable. Reviewers are among those peers who challenge our works and make them stronger. Reviewers are you, us, and all our colleagues who, although extremely busy, spend a significant amount of their time helping us improve our papers. This is all the more difficult as the number of submitted papers keeps increasing annually, overburdening the reviewers. Reviewers are our personal coaches. They help us trace the path from earlier landmark works to our current achievements; they ensure the high quality and integrity of our work; they propose improvements, additions, changes, and alternatives, to strengthen our work and broaden its impact. They give us the best of their own expertise, on a strictly voluntary basis. They are the gatekeepers of the high standards of our Journal.

In 2019, *JGR Solid Earth* benefited from more than 3,000 reviews for papers submitted to the journal, provided by 1,939 of our peers among the international community. On behalf of the *JGR Solid Earth* editorial board, the AGU, and the solid Earth science community at large, I warmly thank you all for your outstanding work and considerable time spent reviewing *JGR Solid Earth* manuscript(s) during 2019.

Isabelle Manighetti

Editor-in-Chief

on behalf of *JGR Solid Earth* editorial board

Individuals in *italics* provided three or more reviews for Solid Earth during the year.
