HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Correction to: *Nature Communications*; <https://doi.org/10.1038/s41467-018-05934-7>; published online 29 August 2018

The original PDF version of this Article contained an error in which Fig. 3 and its legend were omitted and Equations 5 and 6 contained errors. This has been corrected in the PDF version of the Article. The HTML version was correct from the time of publication.

Also in the original PDF version, there were errors in Equations 5 and 6. Both equations omitted all occurrences of Φ , and incorrectly read:

$$(v_f - v_s) = \frac{k(\cdot)}{\eta_f} \delta \rho g$$

$$\lambda = \sqrt{\frac{\eta_s k(\cdot)}{\eta_f \rho}}$$

The correct forms of Equations 5 and 6 are:

$$\Phi(v_f - v_s) = \frac{k(\Phi)}{\eta_f} \delta \rho g$$

$$\lambda = \sqrt{\frac{\eta_s k(\Phi_0)}{\eta_f \Phi_0}}$$

This has been corrected in the PDF version of the Article. The HTML version was correct from the time of publication.
