Key words. instrumentation: high angular resolution – instrumentation: interferometers – techniques: interferometric – stars: pre-main sequence – protoplanetary disks – errata, addenda

The original article contains three typos, which are corrected below.

Section 4.2: a factor $\frac{1}{d^2}$ is missing in the expression (2) of the visibility. The correct expression for the visibility to consider is:

$$V_{\lambda,\mathrm{disk}}(B_\mathrm{p}(i,\theta)) = \frac{1}{F_\lambda(0)}\frac{1}{d^2}\int_{r_\mathrm{in}}^{r_\mathrm{out}} B_\lambda(T_r)\,\epsilon_\tau\,J_0\left[\frac{2\pi}{\lambda}B_\mathrm{p}(i,\theta)\frac{r}{d}\right]2\pi\,r\,\mathrm{d}r. \quad (2)$$

Section 4.2.1: a modulus symbol is missing at the numerator of the expression (6) of the visibility. The correct expression for the visibility to consider is:

$$V_{\mathrm{tot},1} = \frac{\left|F_*(\lambda) + F_{\lambda,\mathrm{disk}}(i)\,V_{\lambda,\mathrm{disk}}(B_\mathrm{p}(i,\theta))\right|}{F_*(\lambda) + F_{\lambda,\mathrm{disk}}(i)}. \quad (6)$$

Section 4.2.2: a modulus symbol is missing at the numerator of the expression (11) of the visibility. The correct expression for the visibility to consider is:

$$V_{\mathrm{tot},2} = \frac{\left|F_*(\lambda) + F_{\lambda,\mathrm{disk_h}}(i)\,V_{\lambda,\mathrm{disk_h}}(B_\mathrm{p}(i,\theta)) + F_{\lambda,\mathrm{disk}}(i)\,V_{\lambda,\mathrm{disk}}(B_\mathrm{p}(i,\theta))\right|}{F_*(\lambda) + F_{\lambda,\mathrm{disk_h}}(i) + F_{\lambda,\mathrm{disk}}(i)}. \quad (11)$$

All the visibility calculations presented in the original article were based on the correct expressions above.
