HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Earth's Future

EDITORIAL

10.1029/2022EF002834

Key Points:

- Earth's Future thanks its reviewers who contributed in 2021
- In 2021, 613 reviewers submitted 904 reviews
- The average time to the first decision in 2021 was around 80 days

Correspondence to:

Abstract We are delighted to publish the names of the 613 peer reviewers who submitted 904 reviews in 2021. We express our deep appreciation for your thoughtful comments and suggestions on manuscripts submitted to *Earth's Future*.

In this article, we are delighted to publish the names of the 613 peer reviewers who submitted 904 reviews in 2021 (italicized names have contributed 3 or more reviews). We express our deep appreciation for your thoughtful comments and suggestions on manuscripts submitted to *Earth's Future*. Your scholarly assessments were fundamental to our decisions, and significantly improved the quality of the published papers.

This past year was particularly challenging for many of our reviewers who did not have access to childcare or lost family members due to the COVID pandemic. Some of our authors had to wait longer than usual to receive their review comments. Despite all challenges, and thanks to our dedicated reviewers, the average time to the first decision did not change significantly and remained around 80 days.

As a transdisciplinary journal, *Earth's Future* examines the state of the planet and its inhabitants, sustainable and resilient societies, the science of the Anthropocene, and predictions of our common future through research articles, reviews and commentaries. Given the observed and expected global environmental and climatic changes, more than ever, we need high quality scientific theories, assessments, and projections about the future of our planet. To ensure the integrity of research in this area, we rely on your expertise and unselfish cooperation. We will need your help in 2022 and beyond.
