HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

† These authors contributed equally to this work.

In the original publication [1], there was a mistake in Figure A2 as published. The sub-figures were the same, but the sub figure Alpha Cen B should be different from Alpha Cen A. The corrected Figure A2 appears below.

Figure A2. Stability maps based on MEGNO values for test particles around Alpha Cen A (left panel) and Alpha Cen B (right panel) over a 100,000-year period for a 20×20 grid in the a – e parameter space. Dynamically stable regions are coloured in blue.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
